

# Remember... a close call is a call for action!

By reporting near misses and close calls, you can:

Help identify and change unsafe work procedures or hazardous conditions in the workplace

Help improve your company's safety culture and employee engagement

Help prevent an injury or death

**A near miss could be the next incident or injury!  
Don't be the weak link in the chain - report!**

Together, let's do our part to keep each other safe
